COLLINS
DYNAMICS

COLLINS DYNAMICS HALOGEN FX SERIES

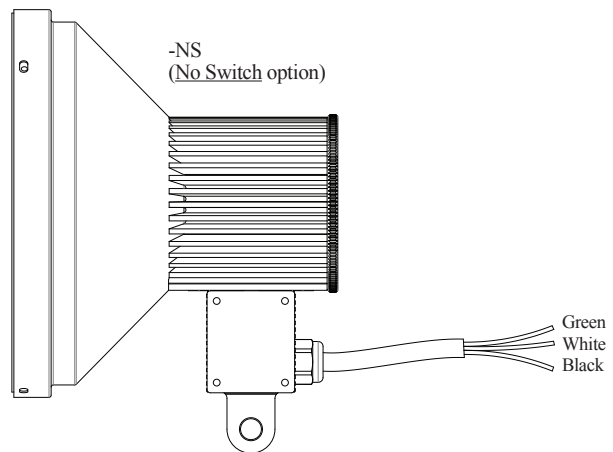

Above photo depicts both the CD-FX-9 and CD-FX-12 models.

Standard configuration is shown with switch.

Attach the red wire to positive 12 VDC and the black wire to negative.

The No Switch optional configuration is shown above.

Best used when wiring with a remote switch.

Attach the green wire to negative and the white and black wires to positive 12 VDC, where black represents spot light and white represents flood light.
